Summary

Data Analyst with 1 year of experience in developing Power BI dashboards, writing SQL queries, and supporting business intelligence reporting. Skilled in data visualization and validation using Power BI, SQL, and SAP Business Objects. Detail-oriented, adaptable, and immediate joiner with strong communication skills.

Skills

Querying & Databases: SQL, SQL Server Management Studio (SSMS)
Business Intelligence & Reporting: Power BI, SAP Business Objects
Data Visualization & Analysis: Dashboard Development, Data Visualization, Data Validation
Tools & Technologies: Advanced MS Excel, Power Query

Experience

Packaged App Development Associate   **November 2024 – October 2025**
Accenture (Mumbai)   *Tools Used: SQL, Power BI, Excel, SAP Business Objects*

- Designed, developed, and maintained **Power BI dashboards** for multiple insurance business units, improving visibility of key metrics across Finance, Operations, Technical Accounting, Underwriting, and Claims.
- Built interactive reports using **SQL, DAX, and SAP Business Objects**, ensuring accuracy, performance, and consistency across all reporting layers.
- Performed **data validation and quality checks** to ensure reliable insights for business stakeholders across diverse teams.
- Collaborated with cross-functional teams and participated in **requirement-gathering discussions with business users**, translating reporting needs into efficient BI solutions.
- Contributed to the BI team in delivering data-driven insights for a large-scale insurance project, enhancing reporting accuracy and stakeholder satisfaction.

Projects

Coffee Sales Data Analysis | *Excel*

- Engineered an interactive **Excel dashboard** using PivotTables, charts, and advanced functions (VLOOKUP, INDEX/MATCH,etc) to analyze and visualize coffee sales data.
- Processed and cleaned customer order records to identify key trends, revealing that the **United States contributed 70% of total sales**.
- Analyzed product-wise and customer-wise performance to uncover high-demand products and top customers, supporting **marketing and inventory planning**.

Sales Performance Dashboard | *Power BI, DAX, Power Query*

- Built an end-to-end **Power BI dashboard** to analyze sales, profit, and customer performance using data provided in the Maven Analytics course.
- Cleaned and transformed datasets in **Power Query**, including removing duplicates, standardizing formats, and creating relationship models.
- Designed an interactive dashboard with slicers and drill-through pages, enabling users to analyze trends across products, regions, and customer categories.
- Identified high-performing products and regional trends, showcasing insights useful for **strategic sales planning**.

Certifications

- **Power BI for Business Intelligence(Udemy):** Completed hands-on modules covering data cleaning, data modeling, DAX, and dashboard development using Power BI.

Education

B.Tech. Information Technology   **Graduated: July 2024**
Pillai College of Engineering, Navi Mumbai   *CGPA: 8.8 / 10*
