Work Experience

IMS Company
Executive (IT) - Student Awareness Department
Duration: 24 months

- Managed ERP system functionalities and delivered IT support with 'LIMA' and 'Salesforce'Providing IT support through "LIMA" and "Salesforce" software

- Contributed to the streamlining of internal IT processes, improving operational efficiency.

Projects

- **Portfolio (HTML, CSS):**
  Visually appealing portfolio showcasing accomplishments and skills effectively.
- **Currency Converter (HTML, CSS, JS - fetch API):**
  Transforming monetary values between different currencies with a user-friendly digital interface.
- **Simulator to WordScape (Python):**
  Created a console-based simulator for the WordScape game where users guess words from given letters.
- **BookApp (HTML, CSS, JS, Bootstrap, MySQL, Python, Django):**
  A Book Management System using CRUD operations to manage book details efficiently.
- **PetStore (HTML, CSS, JS, Bootstrap, MySQL, Python, Django):**
  An e-commerce platform for purchasing pets with features like product browsing, cart management, admin panel operations, user authentication, and filtering/sorting/search functionalities.
- **OneBite (HTML, CSS, JS, Bootstrap, MySQL, Python, Django)**
  An online fast-food ordering platform that allows users to browse a diverse
  range of food items with advanced filtering, sorting, and search capabilities.
  The application features a user-friendly interface for both customers and admins.
  The admin panel offers full control over menu management and user authentication,
  ensuring secure and efficient operations.

  • **Sales Dashboard (Tableau):**
  Built a dynamic dashboard using Tableau to visualize sales data trends, including KPIs like revenue,

top-selling products, regional performance, and monthly comparisons. Focused on interactivity with filters, charts for business insights.
